Lab Manual 1

1. **How do you create the 'Employee_YourName' table?**

   QUERY

```
CREATE DATABASE Employee_Naman;
USE Employee_Naman;

CREATE TABLE Employee_Naman (
    Empno INT PRIMARY KEY,
    Department VARCHAR(50),
    Job VARCHAR(50),
    HireDate DATE,
    Sal DECIMAL(10,2),
    Position VARCHAR(50),
    FirstName VARCHAR(50),
    LastName VARCHAR(50)
);
```

2. **Add a new column 'Email'**

   QUERY

```
ALTER TABLE Employee_Naman
ADD Email VARCHAR(255);
```

3. **Modify 'Sal' to allow NULL**

   QUERY

```
ALTER TABLE Employee_Naman
MODIFY Sal DECIMAL(10,2) NULL;
```

4. **Rename 'Department' to 'Dept'**

   QUERY

```
ALTER TABLE Employee_Naman
CHANGE Department Dept VARCHAR(50);
```

5. **Remove ‘Position’ column**

   QUERY

```
ALTER TABLE Employee_Naman
DROP COLUMN Position;
```

6. **Insert a new employee record**

   QUERY

```
INSERT INTO Employee_Naman
(Empno, Dept, Job, HireDate, Sal, FirstName, LastName, Email)
VALUES
(101, 'IT', 'Developer', '2023-06-15', 60000, 'Aman', 'Sharma',
'aman@gmail.com');
```

7. **Update salary for Empno = 101**

   QUERY

```
UPDATE Employee_Naman
SET Sal = 75000
WHERE Empno = 101;
```

8. **Delete employee with Empno = 101**

   QUERY

```
DELETE FROM Employee_Naman
WHERE Empno = 101;
```

9. **Retrieve employees in IT department**

   QUERY

```
SELECT *
FROM Employee_Naman
WHERE Dept = 'IT';
```

10. Retrieve employees hired after a specific date

QUERY

```
SELECT *
FROM Employee_Naman
WHERE HireDate > '2023-01-01';
```
